EDRS PRICE	MF01/PC09 Plus Postage.
DESCRIPTORS	Associate Degrees; Bachelors Degrees; *Degrees (Academic); Doctoral Degrees; *Educational Certificates; Higher Education; *Majors (Students); Masters Degrees; *Private Colleges; *State Colleges; Two Year Colleges
IDENTIFIERS	*Arkansas

ABSTRACT

Data on degrees conferred by state and private Arkansas colleges and universities are presented, along with a narrative description of trends. Total degree production increased 7.3 percent over the 1977-1978 to 1981-1982 period, rising to 11,345 degrees. While total figures for the state-supported institutions increased annually, degree production at the private colleges tended to fluctuate. Degree production at the different levels remained relatively constant. With regard to subject field, most decreases occurred in traditional liberal arts and education subject areas. At the bachelors level, comparatively large increases have taken place in business and management, computer and information sciences, communications, engineering, and the physical sciences. Tables include an institutional listing of certificates and degrees conferred at the associate, bachelors, masters, and doctoral levels; enrollment by major field of study in certificate, associate, upper division undergraduate and graduate programs; first professional degrees conferred; and degrees and other formal awards conferred for public and private four-year institutions. In addition, in extensive appendices, listings of degrees granted are converted from the Higher Education General Information Survey codes to the Classification of Instructional Programs coding system. PREFACE

The report on degrees granted and program production is one of several compiled annually by Arkansas Department of Higher Education (ADHE) research and planning staff. While recognizing that the granting of degrees may not be the most desirable or accurate measure of a given institution's academic success, it is a measure that is readily available and comparable for the higher education institutions in Arkansas.

Primary data utilized in compiling this report were collected through the Higher Education General Information Survey (HEGIS) and the Arkansas Higher Education Information System (AHEIS). All 31 independent and state-supported schools in Arkansas participate in both the HEGIS and AHEIS reporting systems, thus providing a complete set of comparable data for the time period covered.

The general focus of this report has traditionally been on the degrees granted and enrollment information related to the preceding academic year; however, a change in coding systems necessitated a different format for this year's version. Beginning with the academic year 1982-83, AHEIS/HEGIS reports will incorporate the new Classification of Instructional Programs (CIP) code as adopted by the National Center for Education Statistics. Since all prior year data correspond to the HEGIS taxonomy, ADHE decided to use this opportunity to compile a comprehensive five year listing of degrees granted by all Arkansas institutions. While other analyses of the data are contained in the document, the primary purpose was to prepare, in essence, a historical reference document for future use.

It should be noted that data released by ADHE in the future, as related to degrees granted and enrollment, will <u>not</u> be comparable to the data contained in this report. This information can be "crosswalked" between the HEGIS taxonomy and the CIP code only on a program by program basis at each institution, and that process is susceptible to individual interpretation. Even in the data reported for 1981-82 and preceding years, slight variances exist in the reporting of individual programs from year to year.

This report was prepared by Laura L. Pittman with the assistance of Tom Spencer. The ADHE production division, supervised by Corky Logan, provided a great deal of assistance in preparing the various appendices and readying the text for final publication.

EXECUTIVE SUMMARY

The Degrees Granted and Program Production report, published annually by ADHE, contains data from the preceding academic year as reported through the Arkansas Higher Education Information System and the federal Higher Education General Information Survey. Reports published subsequent to this one will correspond to the Classification of Instructional Programs coding system, while the data in this report corresponds to the HEGIS taxonomy and should be used for reference rather than comparative purposes.

Total degree production in Arkansas increased 7.3% over the period 1977-78 to 1981-82, rising to 11,345 degrees granted last year. While total figures for the state-supported institutions increased annually, degree production at the independent schools tended to fluctuate. Both groups increased in net terms for the five year period studied, increasing 8.3% and 2.2% respectively.

Degree production at the associate, masters, specialist, intermediate, doctoral and first professional levels remained relatively constant over the period. Certificate production peaked at 275 in 1979-80 before falling to its lowest level, 178, during the past year. However, the number of baccalaureate degrees granted rose annually, totalling 7,315 in 1981-82.

With regard to subject field, most decreases occurred in traditional liberal arts and education subject areas, while program production in the "hard sciences" has been on the rise. At the bachelors level, comparatively large increases have taken place in business and management, computer and information sciences, communications, engineering and the physical sciences, while production has fallen off in education, letters and the social sciences.

At the two-year schools, the number of certificates and degrees awarded in the health and paramedical services occupational area increased annually, comprising the second largest number of graduates. The number of occupational degrees awarded appears to be increasing, but the majority of degrees awarded continue to be earned in the general arts and sciences area, often by students planning to transfer to a traditional baccalaureate program.

DEGREES GRANTED AND PROGRAM PRODUCTION BY ARKANSAS INSTITUTIONS OF HIGHER EDUCATION, 1981-82

At present, there are 31 higher education institutions in the state of Arkansas that award earned degrees on an annual basis. The primary purpose of this report is to provide a catalog of all degrees granted by these colleges and universities during the academic years 1977-78 through 1981-82.

Beginning with the academic year 1982-83, data pertaining to enrollment and degrees granted will correspond to a new coding system, the Classification of Instructional Programs (CIP), as approved by the National Center for Education Statistics. Data released in succeeding years will not be comparable to prior year data, thus this report should be used for reference, rather than comparison purposes.

Types of Degrees

Eight major types of earned degrees are awarded annually by Arkansas colleges and universities. For the purposes of this report, the following mutually exclusive degree categories are considered:

1. Postsecondary Certificate or Diploma. The majority of certificates are awarded by the two-year state-supported and independent schools. Typically designed for completion in less than two academic years, most certificate programs are offered in specialized areas including business and commerce, data processing, health or public services, and mechanical or natural science technologies.

2. Associate Degree. An associate degree is granted following completion of an academic program of at least two years but less than the four years required by traditional baccalaureate programs. These degrees may be either terminal or preparatory for further postsecondary study.

3. Baccalaureate Degree. Baccalaureate degrees are earned after completion of a specified academic program of a minimum of four years.

4. Masters Degree. In liberal arts and sciences, masters degrees are customarily awarded upon completion of one to two years of academic work at the post-baccalaureate level. In professional fields such as law and medicine, the masters degree is an advanced degree usually earned after completion of a first professional degree.

5. Specialist Degree or Certificate. Specialist degrees, commonly in the field of education, are a type of intermediate degree earned between completion of the masters and doctoral degree.

6. Intermediate Degree. Other intermediate degrees are awarded as recognition for a program intermediate between masters and doctoral degrees. In essence, the intermediate degree is a doctoral degree without a dissertation.

7. Doctoral Degree. Reported independently of first professional degrees, doctorals are regarded as the terminal degree in a profession or academic discipline. An average of three years of graduate work and publication of a formal dissertation are common requirements for this type of degree.

8. First Professional Degree. These degrees require a minimum of six years of postsecondary academic study, including two years of college work completed prior to admission to the program. First professional degrees are awarded in three fields in the state of Arkansas (i.e. law, medicine and pharmacy) and must be completed before establishing a practice in these professions. It should be noted that the University of Arkansas Medical Sciences Campus (UAMS) also offers both a bachelors program in pharmacy and a D.Phar. that qualify graduates for licensure, but only the D.Phar. is considered a first professional degree.

DATA: SOURCES, DEFINITIONS AND FORMAT

The data presented in this report were collected through the Arkansas Higher Education Information System (AHEIS) and the Higher Education General Information Survey (HEGIS). All degrees granted reports were compiled on a July 1 to June 30 fiscal year basis, and thus include data for the second summer, fall, spring and first summer terms of a given academic year. Where possible, degrees granted through military bases and other off-campus instruction programs were omitted. For example, the University of Arkansas at Fayetteville (UAF) awarded a large number of degrees (166 in 1981-82) through a masters level Operations Management military base program.

In compiling the five year historical tables for the 12 independent schools, information for the initial two years was obtained from reports generated through ADHE's reporting system. For the academic years 1979-80 to present, HEGIS reports were utilized.

Enrollment figures are split into four basic divisions, i.e. certificate, associate, upper division undergraduate and graduate enrollment. It should be noted that the graduate figures include all post-baccalaureate enrollees with the exception of first professional degree students. Reported following completion of the eleventh class day of the fall term, the enrollment data reflect only on-campus, credit enrollees.

In addition to the statistics presented throughout the report narrative, a great deal of historical and other data is provided in the appendices. A comprehensive five year listing of degrees granted by all Arkansas higher education institutions is included as Appendix A, with data broken out by type of degree and corresponding to the HEGIS taxonomy. Appendix B is a compilation of all postsecondary degrees granted in Arkansas during the 1981-82 academic year. The tables provide a cross reference for the four groups of schools (i.e. state-supported two-year and four-year, and independent two-year and four-year).

Appendix C presents a listing of fall 1981 enrollment figures, by major field of study, for certificate, associate, upper division undergraduate and graduate programs at all 31 schools. Appendix D includes the HEGIS-to-CIP conversion lists to be used by the schools beginning with the 1982-83 reporting cycle. Finally, Appendix E provides a list of the names and corresponding abbreviations for the 31 higher education institutions in Arkansas.

FIVE YEAR TRENDS: TYPE OF DEGREES GRANTED

Total degree production in Arkansas increased 7.3% over the five year period 1977-78 to 1981-82 (see Table 1). Increases were realized each year with the exception of a decrease of less than 1% between the first two academic years considered. During that time, the total number of degrees granted dropped from 10,572 in 1977-78 to 10,474 in 1978-79 before rising to the current level of 11,345 for the 1981-82 academic year.

TABLE 1. DEGREES GRANTED AND OTHER FORMAL AWARDS CONFERRED BY ARKANSAS INSTITUTIONS, 1977-78 THROUGH 1981-82

	1977-78	1978-79	1979-80	1980-81	1981-82
STATE INSTITUTIONS

Intermediate	16	16	14	14	15
Doctoral	108	93	108	105	126
First Professional	350	342	345	391	382
TOTAL DEGREES GRANTED	10,572	10,474	11,022	11,025	11,345

While total degree production at the two-year and four-year state-supported institutions increased annually for the period, the figures for the independent institutions showed considerable fluctuation. However, both groups showed a net increase in 1981-82 relative to 1977-78, with the total number of degrees granted increasing 8.3% and 2.2% respectively for the state-supported and independent schools over the five year period. Figure 1 illustrates the proportional relationships among four major types of degrees granted (i.e. certificate/associate, bachelors, masters, other graduate) for each of the five years considered.

The degrees awarded by the 19 state-supported institutions represent a very large percentage of the total number of degrees awarded annually--over 79% in any given degree category. For this reason, the relative increases or decreases in the program production figures for the state-supported institutions tend to closely approximate the trends apparent in the total figures.

Certificates/Associate Degrees

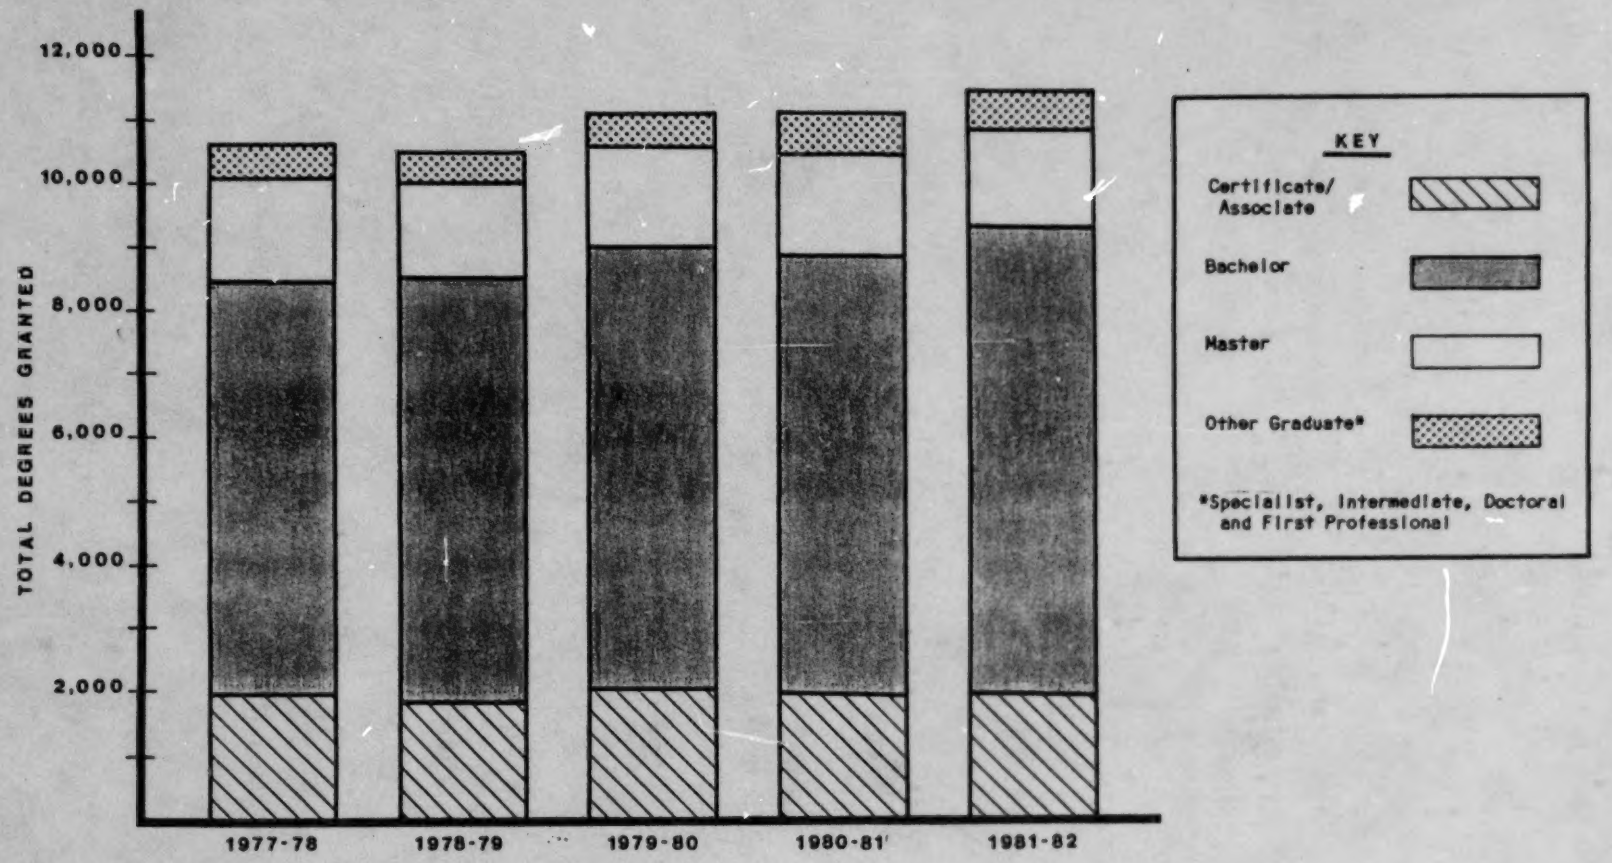
After reaching a peak for the five year period with a total of 275 certificates awarded in 1979-80, the certificate production dropped to its lowest level in five years during 1981-82, with a total of 178. For the five years considered, state-supported institutions awarded over 95% of the certificates granted in a given academic year.

Associate degree production has fluctuated considerably over the past five years. The number of degrees granted by the independent schools dropped considerably following the initial year, from a high of 230 in 1977-78 to lows of 157 and 151 during the next two years. The figures for state-supported schools reversed annually, compiling an average of 1,437 degrees granted, or 88.9% of the total number of degrees in this category.

Baccalaureate Degrees

While state-supported and total degree production at the bachelors level increased annually from 1977-78 through 1981-82, slight fluctuations occurred in the independent institutions' production. This category traditionally has

FIGURE 1. TYPE OF DEGREES GRANTED AS A PROPORTION OF TOTAL DEGREES GRANTED BY ARKANSAS INSTITUTIONS, 1977-78 THROUGH 1981-82



the largest percentage representation by the independents, averaging 20.7%, or 1,425 per year, of a total annual average of 6,886 degrees.

Masters Degrees

After decreasing from 76 in 1977-78 to 60 in 1978-79, the number of masters degrees awarded by independent institutions increased annually to the current level of 100 for 1981-82. However, the state-supported institutions typically award over 95% of the degrees at this level, and as is the case in most categories the total trends tend to follow the trends set by the state-supported schools.

The low figure for the state-supported institutions was 1,481 in 1978-79, while the high was 1,609 during 1980-81. On the average, 1,547 masters degrees have been awarded annually by these institutions, compared to an average of 75 by the independent colleges and universities.

Other Graduate Degrees

All other graduate degree programs in Arkansas--specialist, intermediate, doctoral and first professional--are offered only at selected state-supported institutions. During the past five years, specialist degrees have been awarded only by Arkansas State University-Jonesboro (ASUJ) and UAF. Of 226 degrees awarded in that period, 96.5% were in the field of education, with the remaining 3.5% being awarded by UAF in the fields of English and history.

With the exception of one degree awarded by UAF, all intermediate degrees have been granted by UAMS. These degrees, averaging 15 per year, have been for the completion of a post-baccalaureate dietetic internship program.

Only two universities offer doctoral programs, UAF and UAMS. Degrees are currently awarded in ten major academic disciplines and production has averaged 108 total degrees awarded for the period studied.

Finally, first professional degree programs are offered at three state-supported schools, UAF, UAMS and the University of Arkansas at Little Rock

(UALR). As noted in Table 2, programs in law and the health professions (e.g., medicine, pharmacy) are currently available, and graduates average 362 per year for all first professional areas. As discussed earlier, UAMS considers only the D.Phar. degree as first professional and most pharmacy degrees granted are reported as bachelors degreees.

TABLE 2. FIRST PROFESSIONAL DEGREES CONFERRED BY ARKANSAS INSTITUTIONS, 1977-78 THROUGH 1981-82

SCHOOL	PROGRAM AREA	1977-78	1978-79	1979-80	1980-81	1981-82

For a complete listing of the degrees granted by Arkansas colleges and universities during the five year period 1977-78 through 1981-82, refer to Appendix A.

FIVE YEAR TRENDS: SUBJECT FIELDS

Baccalaureate Degrees

Table 3 provides a five year listing, corresponding to the HEGIS taxonomy, of the baccalaureate degrees granted by Arkansas institutions. As mentioned previously, total degree production at the bachelors level did increase annually over this time period. However, noticeable changes have been occurring in both the number and percentage of degrees granted in various subject fields (see Figure 2).

TABLE 3. BACCALAUREATE DEGREES CONFERRED BY SUBJECT AS A PERCENTAGE OF TOTAL BACCALAUREATE DEGREES CONFERRED IN ARKANSAS 1977-78 THROUGH 1981-82

		1977-78		1978-79		1979-80		1980-81		1981-82

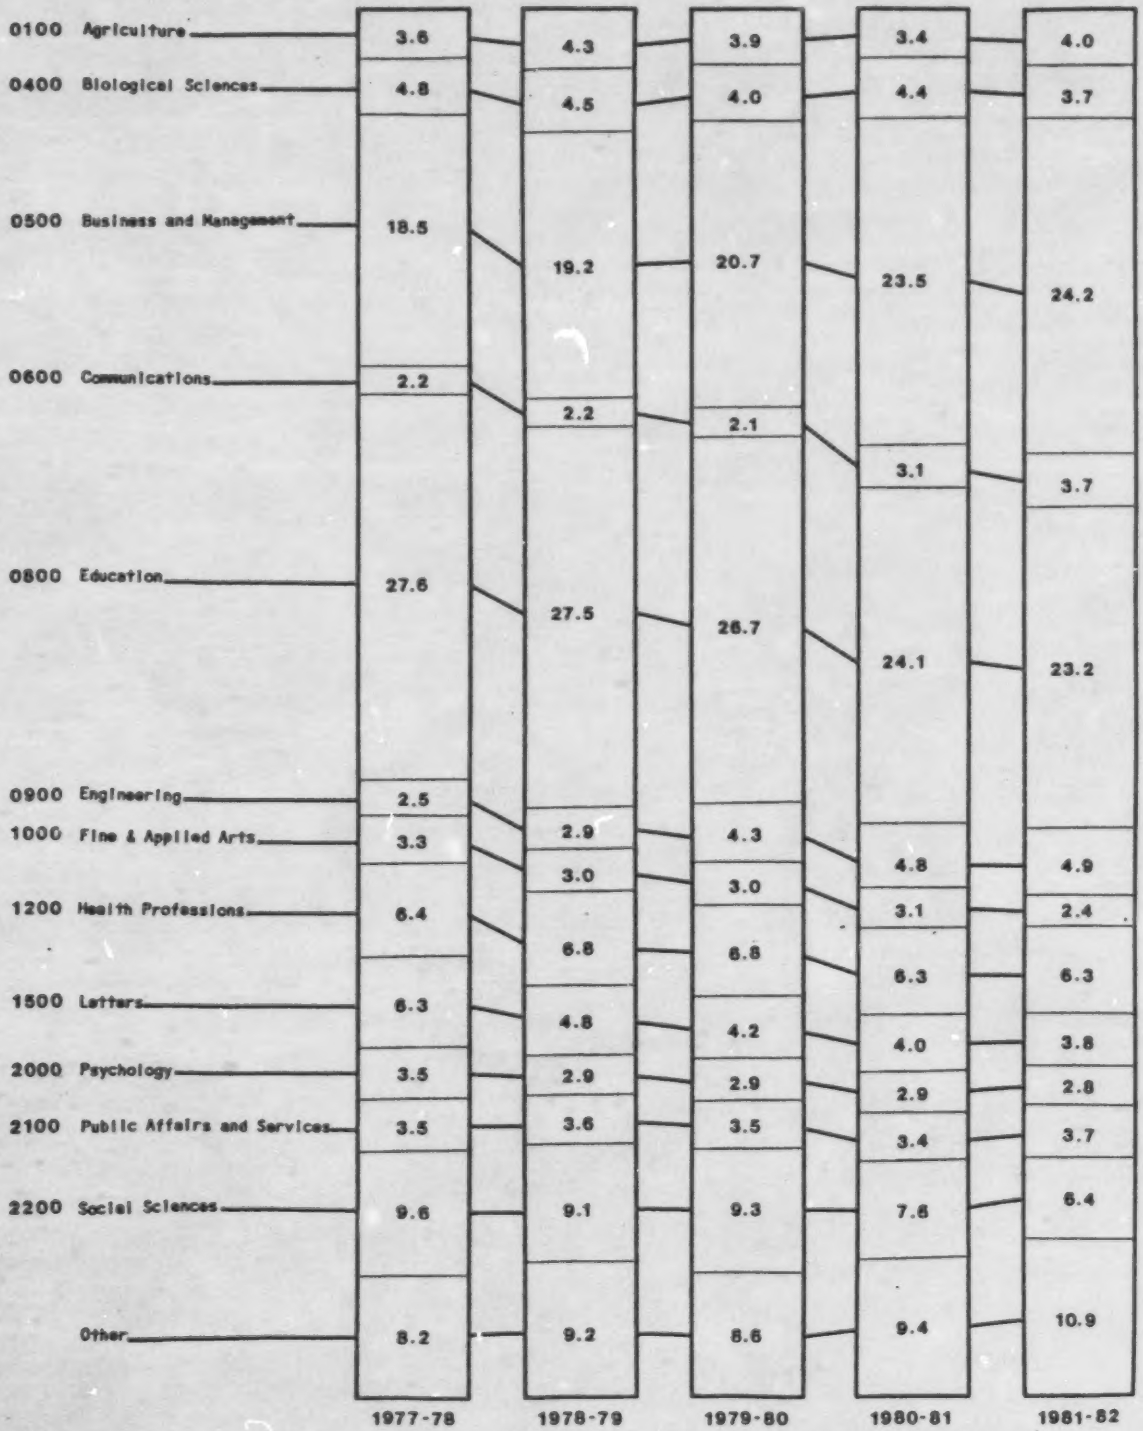
4900	Interdisciplinary Studies	26	.40%	31	.46%	25	.36%	34	.49%	49	.67%
TOTAL		6,533	100.00%	6,666	100.00%	6,959	100.00%	6,961	100.00%	7,315	100.00%

Traditionally, the largest proportion of baccalaureate degrees have been granted in the field of education. Annual production increased slightly from 1977-78 through 1979-80, when 1,858 education related degrees were awarded. However, in 1980-81 production fell approximately 9.7% to a total of 1,678--the low for the five year period. In addition, the percentage share of total bachelors degrees awarded has decreased annually from a high of 27.6% in 1977-78 to the current level of 23.2% for 1981-82.

Decreases in percent of total degrees awarded also occurred in two other major subject areas, letters and psychology. Letters fell from 6.3% in the initial year, to a low of 3.8% for 1981-82. Numerically, this category decreased from a high of 414 degrees in 1977-78 to a low of 276 in 1980-81 before increasing

FIGURE 2. BACCALAUREATE DEGREES CONFERRED BY SUBJECT FIELD AS A PERCENTAGE OF TOTAL BACCALAUREATE DEGREES CONFERRED BY ARKANSAS INSTITUTIONS, 1977-78 THROUGH 1981-82



slightly to 280 the following year. A significant percentage drop also occurred in the social sciences, which now represent 6.4% of the total baccalaureate degrees awarded, as compared to 9.6% at the onset of the five year period.

While most of the decreases have taken place in traditional education and liberal arts oriented subject areas, the shift to increasing program production can be noted in the "hard sciences". This trend essentially reflects the changes taking place in today's job market which is moving toward more specialized, technical fields as the economy becomes increasingly mechanized due to technological innovation and invention.

Three subject areas--business and management, computer and information sciences and engineering--increased both in numerical and percentage terms. In addition, communications and the physical sciences increased numerically for the period studied.

Business and management related degrees have typically been the second largest degree-producing subject area, following only education. However, with annual percentage increases over the five year period, this category surpassed education during the 1981-82 academic year. For that year, business degrees represented 24.2% of total baccalaureate degrees conferred as compared to 23.2% in education. This reflected a significant growth in business' percentage share which had only been 18.5% in 1977-78, compared to 27.6% in education. The number of business degrees awarded annually has also grown at a rapid rate since 1978-79, climbing from 1,277 to 1,768 over a four-year period.

The number and percentage of degrees in computer and information sciences are comparatively small. However, the number of available programs and the number of graduates seem to be increasing annually as the labor market continues to demand more individuals qualified in this area. Similarly, degree production has more than doubled in the engineering field since 1977-78. In that year, 160 (2.5%) degrees were awarded, compared to 355 (4.9%) in 1981-82.

Masters and Doctoral Degrees

The five year numerical and percentage listings for masters and doctoral degrees are presented in Table 4 and Figure 3. While changes are not as readily apparent for these post-baccalaureate degrees, several trends are suggested by the five year subject field data.

TABLE 4. MASTERS AND DOCTORAL DEGREES CONFERRED BY SUBJECT FIELD AS A PERCENTAGE OF TOTAL MASTERS AND DOCTORAL DEGREES CONFERRED IN ARKANSAS, 1977-78 THROUGH 1981-82

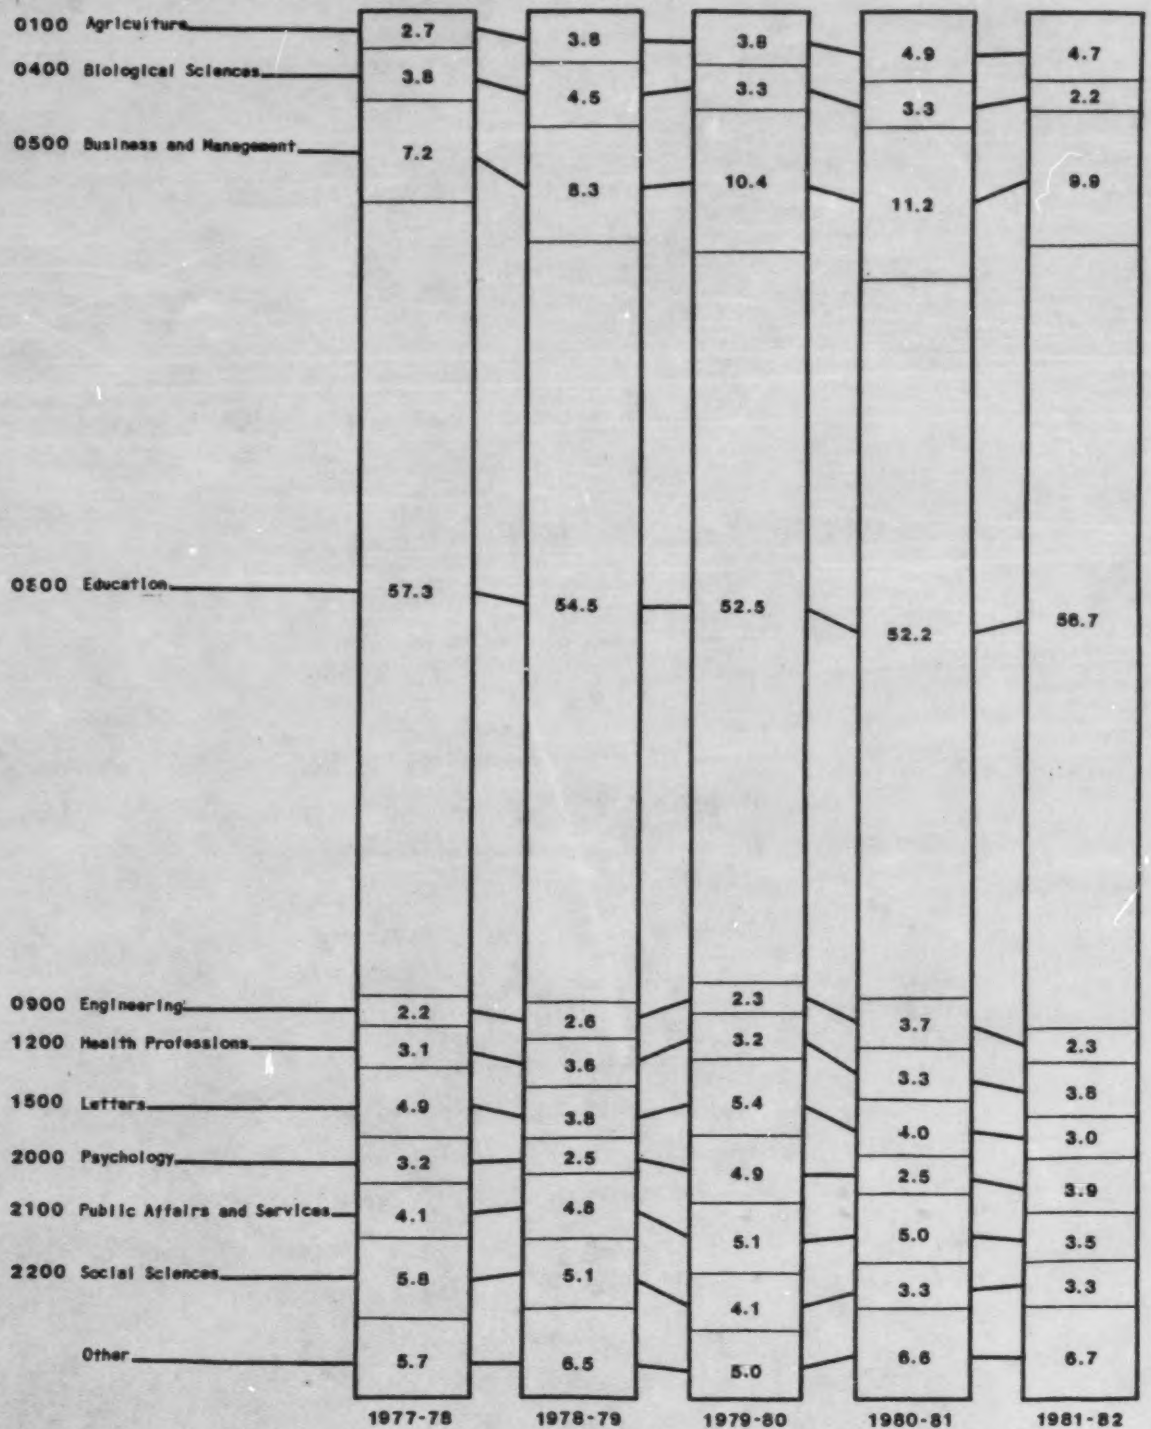
4900	Interdisciplinary Studies	11	.63%	9	.55%	9	.52%	14	.78%	3	.17%
TOTAL		1,753	100.00%	1,634	100.00%	1,715	100.00%	1,785	100.00%	1,760	100.00%

As with bachelors degrees, education has traditionally been the largest degree producing subject area. At the masters and doctoral levels, this field alone has produced in excess of 52% of the total degrees awarded annually by Arkansas higher education institutions. Interestingly, after setting a high mark of 57.3% of the post-baccalaureate degrees granted in 1977-78, the percentage of education degrees fell annually to a low of 52.2% in 1980-81. However, the 1981-82 academic year brought a significant upturn, as education graduates increased to 56.7% of degrees conferred at these levels.

Degree production at the post-baccalaureate level seems less predictable in comparison to bachelors degrees. While no major subject field recorded annual percentage or numerical increases over the five year period studied, changes similar to those mentioned in the preceding section did occur.

FIGURE 3. MASTERS AND DOCTORAL DEGREES CONFERRED BY SUBJECT FIELD AS A PERCENTAGE OF TOTAL MASTERS AND DOCTORAL DEGREES CONFERRED BY ARKANSAS INSTITUTIONS, 1977-78 THROUGH 1981-82



Business and management degrees grew in number annually through 1980-81, before falling off slightly during the past year. With 126 (7.2%) degrees conferred in 1977-78, this category increased to a high of 199 (11.2%) in 1980-81, followed by 174 (9.9%) in 1981-82.

Again following the trend of undergraduate degree production, the number of degrees awarded in the social sciences fell considerably during the period, compiling annual numerical decreases. This subject field also declined in terms of total percentage points, from 5.8% in 1977-78, to a low of 3.3% for the past two years.

Averaging 1,729 degrees awarded annually, the number of masters and doctoral degrees granted has fluctuated from year to year. The low occurred in 1978-79, with a total of 1,634, while the peak was 1,785 in 1980-81.

1981-82 DEGREES GRANTED AND TRENDS BY TYPE OF INSTITUTION

During the 1981-82 academic year, a total of 11,345 postsecondary certificates and earned degrees were awarded by the 31 higher education institutions in Arkansas. Of this number, 84.4% were granted by the 19 state-supported institutions and the remaining 15.6% were awarded by the 12 independent schools (see Figure 4). For a complete listing of the number of degrees granted by type of institution and corresponding to the HEGIS taxonomy, refer to Appendix B.

Of a total of 1,819 certificates and associate degrees granted, 1,622 (89.2%) were awarded by state-supported schools and the remaining 197 (10.8%) by independent institutions. A total of 1,469 bachelors degrees (20.1%) were awarded by the independent schools, while 5,846 (79.9%) were earned at state-supported institutions.

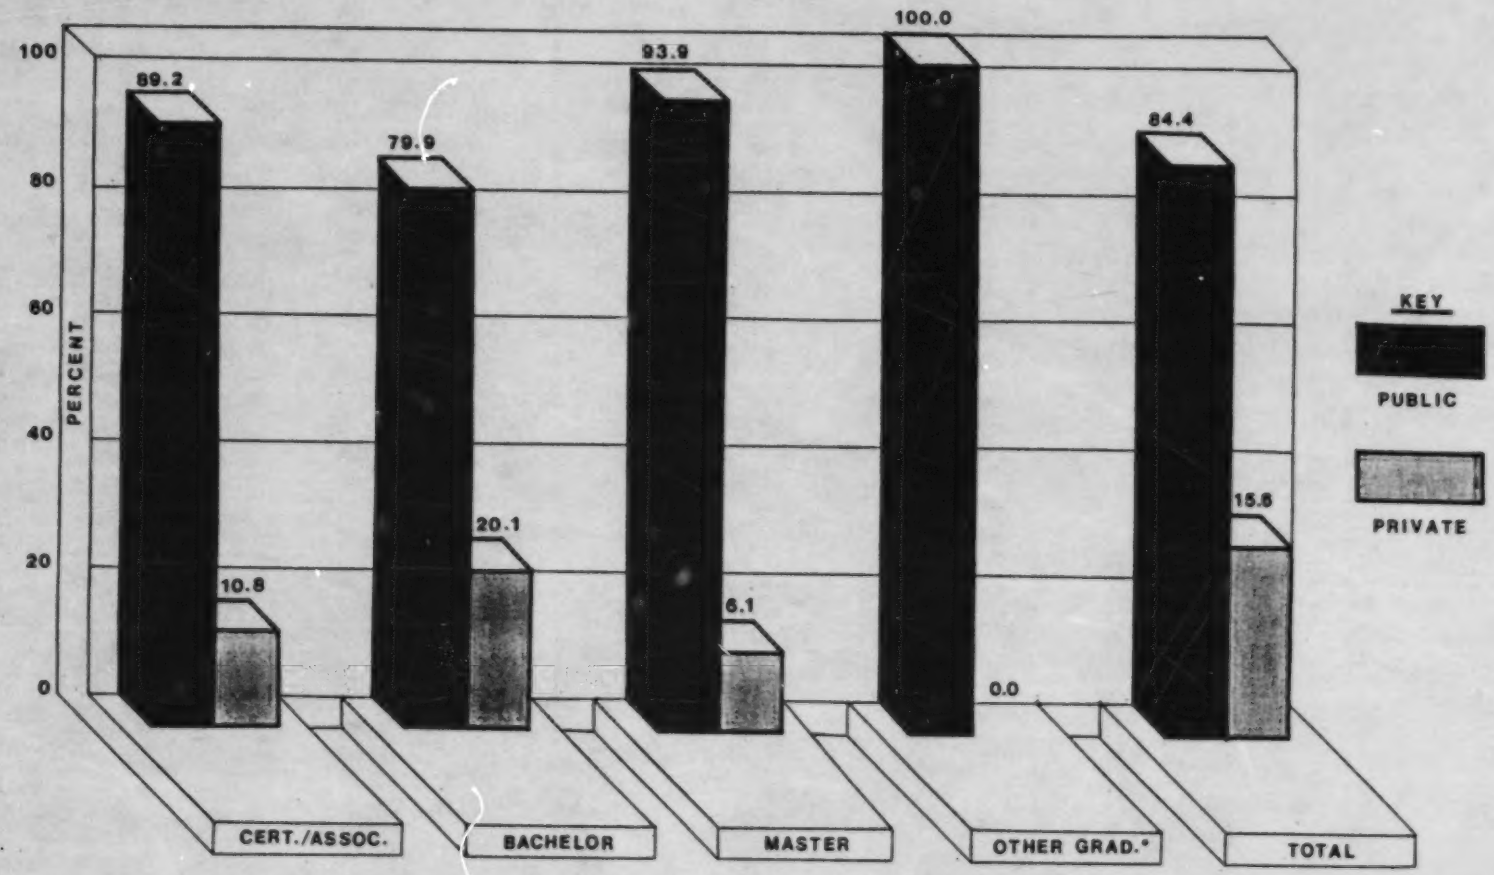
At the masters level, 93.9% (1,534) were awarded by the state-supported schools and 6.1% (100) by the independent schools. As mentioned earlier, all other graduate degrees (i.e. specialist, intermediate, doctoral, first professional) are awarded only by a limited number of state-supported schools. In 1981-82, a total of 577 other graduate degrees were earned, including 54 specialist, 15 intermediate, 126 doctoral and 382 first professional.

Independent Two-Year Institutions

Over the past five years, degree production by subject field has varied little at the three independent two-year colleges in Arkansas. As indicated in Table 5, only five certificates were awarded by these schools during 1981-82. All certificates granted in 1981-82 and in the preceding four years were earned in either secretarial or public service related technologies.

All associate degrees granted by Crowley's Ridge College (CRC) and Shorter College (SC) during the period studied were general arts and sciences academic programs. Southern Baptist College (SBC) awards an average of 90% of its

FIGURE 4. DEGREES GRANTED BY TYPE OF DEGREE AND PERCENTAGE AWARDED BY STATE AND INDEPENDENT INSTITUTIONS IN ARKANSAS, 1981-82



*Specialist, Intermediate, Doctoral and First Professional

associate degrees in this field, a percentage which rose as high as 97.4% for 1981-82. In addition, SBC has granted degrees in both business and public service related technologies.

TABLE 5. SUMMARY OF DEGREES AND OTHER FORMAL AWARDS CONFERRED BETWEEN JULY 1, 1981 AND JUNE 30, 1982 FOR INDEPENDENT TWO-YEAR INSTITUTIONS

	CRC	SC	SBC	TOTAL
Certificates	3	-	2	5
Associate	28	51	77	156
TOTAL	31	51	79	161

Independent Four-Year Institutions

The nine four-year independent institutions in the state offer earned degree programs at four levels--certificate, associate, bachelors and masters (see Table 6). Although other four-year independent schools have awarded certificates in past years, only Central Baptist College (CBC) did so in 1981-82.

TABLE 6. SUMMARY OF DEGREES AND OTHER FORMAL AWARDS CONFERRED BETWEEN JULY 1, 1981 AND JUNE 30, 1982 FOR INDEPENDENT FOUR-YEAR INSTITUTIONS

	ABC	AC	CBC	CO	HU	HC	JBU	OBU	PSC	TOTAL
Certificates	-	-	3	-	-	-	-	-	-	3
Associate	-	-	19	-	4	-	10	-	-	33
Bachelors	28	82	11	106	562	200	115	282	83	1,469
Masters	-	-	-	-	33	-	-	67	-	100
TOTAL	28	82	33	106	599	200	125	349	83	1,605

Three schools awarded a total of 33 associate degrees in 1981-82. All associate degrees conferred by CBC have traditionally been general arts and science degrees and all granted by Harding University (HU) have been in the field of secretarial technology. However, John Brown University (JBU) offers a number of programs at this level, including degree programs in various business, mechanical and public service technologies, as well as in the general arts and sciences.

Baccalaureate degrees comprise the largest percentage of earned degrees awarded by the four-year independents, averaging in excess of 84% each year. Although the total number of degrees granted at this level fluctuated annually over the

five year period, the largest number granted in a given year was 1,469 during 1981-82. During that year, two major subject fields--business and education--accounted for almost half of the degrees granted at this level. With the exception of CBC, all of the four-year independents offer degrees in these subject fields. The number of business degrees awarded increased annually over the period, beginning with a low of 259 (18.4%) during 1977-78 and rising to 359 (24.4%) in 1981-82. However, this group posted its largest percent of total at 25.2% (355) in 1980-81.

With the exception of a slight numerical decrease in 1980-81, the number of education degrees rose annually to a high of 360 (24.5%) in 1981-82. This trend opposes the decrease in bachelors level production at the state-supported schools, which dropped off after peaking in 1979-80 and has declined in percent of total annually over the five year period. Although fluctuating somewhat in terms of proportion of total bachelors degrees awarded annually by the independent schools, the 24.5% share represented both the high for education during the five year period, and the high subject field for the 1981-82 academic year.

Annual numerical increases were also reported in the fields of communications, computer science and engineering. These three areas represent a comparatively small proportion of the degrees awarded in any given year, but lend credibility to the premise of growing interest and demand in the more technical fields of study.

Conversely, with the exception of slight increases during one year of the period, annual numerical and percentage decreases occurred in the fine arts and in letters. The field of social sciences, after rising to a numerical and percentage peak (163/11.2%) in 1979-80, dropped considerably over the next two years, falling to a period low of 108 (7.4%) in 1981-82.

Masters degree production by independent institutions was at its highest level for the period in 1981-82, with 100 degrees granted. Only two of the nine schools offer degree programs at this level, HU and Ouachita Baptist University (OBU). While all of the degrees awarded in 1981-82 were in the field of education, degrees have been granted in several other academic areas in the past.

State Two-Year Institutions

There are currently nine state-supported two-year institutions in Arkansas which offer degree programs at the certificate and associate levels. In 1981-82, 137 certificates and 1,049 associate degrees were awarded by these schools (see Table 7), for a total of 1,186 degrees granted.

TABLE 7. SUMMARY OF DEGREES AND OTHER FORMAL AWARDS CONFERRED BETWEEN JULY 1, 1981 AND JUNE 30, 1982 FOR STATE TWO-YEAR INSTITUTIONS

	ASUB	EACC	GCCC	MCCC	NACC	PCCC	SAUE	SAUT	WCC	TOTAL
Certificates	2	3	8	1	-	73	1	-	49	137
Associate	94	81	87	115	97	122	47	118	288	1,049
TOTAL	96	84	95	116	97	195	48	118	337	1,186

After rising to a high of 201 in 1979-80, certificate production dropped 31.8% to the 1981-82 level of 137. This decrease can be attributed primarily to a decline in certificates awarded by Westark Community College (WCC). WCC traditionally grants the largest percentage of degrees awarded by a state-supported two-year institution, but certificate production fell from a high of 103 to a low of 49 (-52.4%) over the same three year period. According to WCC officials, the large increase in the number of certificates and associate degrees reported during the 1979-80 year was a one time occurrence. During that year, a large number of degrees were awarded to former students, primarily part-time enrollees, who after completing degree requirements had not applied for the degree.

During the five year period studied, certificates were offered in five occupational program areas (e.g. business and commerce, data processing, health services and paramedical, mechanical and engineering, and public service related technologies). Certificate production at the nine schools varied annually in each of these subject areas, with health related programs producing the highest average (57.4) number of certificates.

Program production also varied at the associate degree level, with total production also peaking in 1979-80 at 1,116. Only the health services and

paramedical technologies showed annual numerical increases, rising from 195 degrees granted in 1977-78 to 227 in 1981-82. This occupational program area provided the second largest group of graduates annually, averaging 207.8 per year.

At the associate degree level, the majority of degrees granted are classified in the general arts and sciences program area. These academic programs are typically designed for students who plan to transfer to a four-year college, but also provide a general educational background for those who pursue the associate as a terminal degree. This category accounted for an average of 557.2 (53.3%) degrees per year, and produced less than half of the total in 1981-82 only, when 498 of 1,049 (47.5%) degrees were awarded in this area.

State Four-Year Institutions

As indicated in Table 8, a total of 8,393 degrees were awarded by Arkansas' 10 state-supported institutions during the 1981-82 academic year. As mentioned previously, this group offers earned degree programs at eight levels, including certificate, associate, baccalaureate, masters, intermediate, specialist, doctoral and first professional.

TABLE 8. SUMMARY OF DEGREES AND OTHER FORMAL AWARDS CONFERRED BETWEEN JULY 1, 1981 AND JUNE 30, 1982 FOR STATE FOUR-YEAR INSTITUTIONS

	ASUJ	ATU	HSU	SAUM	UAF	UALR	UAM	UAMS	UAPB	UCA	TOTAL
Certificates	6	-	-	-	-	-	-	27	-	-	33

First Professional	-	-	-	-	147	102	-	133	-	-	382
TOTAL	1291	496	389	305	2896	1007	254	387	405	963	8,393

Only two schools granted certificates during the five year period studied, ASUJ in secretarial technologies and UAMS in various health service and paramedical technologies. Total production dropped significantly during this time period, falling from 106 in 1977-78 to 33 in 1981-82. During that time, ASUJ production remained small but comparatively consistent, while the UAMS figures fell from 103 in 1977-78 to 27 in 1981-82.

All 10 institutions granted associate degrees annually during the period, with the largest average number, 275.8 of 392.2, being awarded in health and paramedical technologies. This occupational area annually comprised over 67% of the total degrees awarded at this level.

Total associate degree production remained fairly constant over the period, with slightly over 400 degrees awarded annually except in 1980-81. During that year, the number of degrees awarded in the health field fell significantly and the low total for the period was 349.

The baccalaureate degree category is the largest, with 5,846 degrees awarded during the 1981-82 academic year. Each state-supported four-year institution offers several academic programs at this level, with 1981-82 production ranging from 152 degrees granted by UAMS to 1,842 by UAF.

Degree production at this level rose annually over the five year period, aided by annual numerical increases in several academic program areas. The number of business degrees increased significantly, from 948 in 1977-78 to 1,409 in 1981-82. In addition, communications, computer science, engineering and physical sciences reached their highest levels during the 1981-82 academic year. Conversely, degree production in social sciences, letters and education tended to decrease over the period, with education reaching a low of 1,338 degrees granted in 1981-82.

Total baccalaureate degree production increased from 5,122 in 1977-78 to 5,846 in 1981-82. This was partly due to annual increases at UAF, where the number of bachelors degrees granted rose from 1,377 in 1977-78 to 1,842 in 1981-82. Production at both UALR and the University of Arkansas at Pine Bluff (UAPB) increased significantly over the five year period, rising from 474 to 624 and from 320 to 400, respectively. In addition, production at Arkansas Tech University (ATU) rose to 443 in 1981-82, after averaging 344 bachelors degrees granted during the first four years of the period.

Minor decreases occurred annually at UAMS, where the number of bachelors degrees fell from 166 in both 1977-78 and 1978-79 to 152 in 1981-82. However, production at Henderson State University (HSU) dropped off from 406 in 1978-79 to 291 in 1981-82.

Total degree production at the masters and doctoral degree levels tended to fluctuate more over the period, ranging from the 1978-79 low of 1,574 to the 1980-81 high of 1,714. Education degrees annually comprised over 50% of the post-baccalaureate degrees awarded by the state-supported four-year schools. Production in this academic area fell from 959 in 1977-78 to 844 in 1979-80 before rising to 898 degrees in 1981-82. At the start of the period, education degrees accounted for 57.2% of the masters and doctoral degrees granted, but their share fell to 50.8% in 1980-81 before increasing to 54.1% in 1981-82.

Prior to 1981-82, the number and percentage of business related degrees rose annually to a 1980-81 peak of 199 degrees (11.6%). Although the number fell to 175 (10.5%) in 1981-82, this still represented a significant increase over the 1977-78 figure of 126 (7.5%).

FALL 1981 ENROLLMENT BY MAJOR FIELD OF STUDY

Since fall 1982 enrollment figures correspond to the CIP coding system, only fall 1981 enrollment data are included in this report (see Appendix C for enrollment by institution). Information on fall 1982 enrollment at Arkansas institutions, though not comparable to the data presented here, will be available from ADHE at a later date. 1980-81 and 1981-82 data for the state-supported schools are included in the ADHE report, Academic Degree Programs in Arkansas State-Supported Colleges and Universities: Enrollment and Degrees Awarded, 1976-77 Through 1980-81. As stated earlier, enrollment figures are reported following completion of the eleventh class day of the fall term, and reflect only on-campus credit enrollees.

Upper Division Undergraduate

Table 9, which corresponds to the HEGIS taxonomy, provides numerical and percentage upper division enrollment data for state-supported, independent and all higher education institutions in Arkansas. Of the 18,710 upper division enrollees reported for fall 1981, 15,424 (82.4%) were enrolled at state-supported institutions, with the remaining 3,286 (17.6%) at independent institutions.

These figures differ from the totals for bachelors degrees awarded during 1981-82. For that academic year, the independent schools granted 20.1% (1,469) of the bachelors degrees, while the state-supported institutions awarded 79.9% (5,846) of the 7,315 baccalaureate degrees conferred. Five year average figures show a slightly larger percentage, 20.7% (1,424.6), of degrees granted by the independent schools, compared to 79.3% (5,462.2) awarded by state-supported institutions.

Two academic program areas, business and education, accounted for over 40% of the fall 1981 upper division enrollees. It should be noted that over 10% of the enrollees were classified as undecided with regard to major field of study.

TABLE 9. UPPER DIVISION ENROLLMENT, FALL 1981

Code	Discipline	State Institutions Number	State Institutions Percent	Independent Insti. Number	Independent Insti. Percent	All Institutions Number	All Institutions Percent

2300	Theology	-	-	147	4.47%	147	.79%
4900	Interdisciplinary Studies	45	.29%	9	.27%	54	.29%
	Undecided	1,702	11.04%	221	6.73%	1,923	10.28%
TOTAL		15,424	100.00%	3,286	100.00%	18,710	100.00%

With only a few exceptions, both types of schools offered programs in most academic areas. Only the state-supported schools reported upper division enrollees in agriculture and architecture programs, and only the independents had students in area studies, library science and most notably, theology.

Graduate

Table 10 provides graduate enrollment data as reported by all Arkansas institutions for the fall 1981 term. The graduate enrollment figures include all post-baccalaureate enrollees with the exception of first professional degree students (i.e. masters, doctoral, specialist, intermediate).

TABLE 10. GRADUATE ENROLLMENT, FALL 1981

2300	Theology	-	-	6	7.79%	6	.13%
4900	Interdisciplinary Studies	3	.07%	-	-	3	.07%
	Undecided	546	12.34%	-	-	546	12.13%
TOTAL		4,423	100.00%	77	100.00%	4,500	100.00%

Of 4,500 total enrollees, 4,423 (98.3%) attended state-supported schools. The independent institutions accounted for only 1.7% (77) of the fall 1981 total, with enrollees reported in only education and theology. However, their percentage of total 1981-82 post-baccalaureate graduates was considerably greater, with 5.5% (100) of the graduates as compared to 94.5% (1,729) at the state-supported schools. Five year average figures were slightly lower, with the independent and state-supported schools having 4.2% (74.8) and 95.8% (1,714.8) of the graduates, respectively.

As with upper division enrollment, business and education programs accounted for the greatest percentage of graduate enrollees with over 42%. At the graduate level, 12.1% (546) of the enrollees were reported as being undecided about their majors.

APPENDIX D

CONVERSION OF DEGREES GRANTED FROM HEGIS TO CIP

CONVERSION OF OCCUPATIONAL PROGRAMS FROM HEGIS TO CIP

The following areas of the Classification of Instructional Programs (CIP) code are to be classified as occupational with corresponding responsibility by the Arkansas Vocational Technical Education Division. For reporting purposes, all lower level student semester credit hour production in these CIP categories will be considered occupational.

1.	07.'s	Business and Offics
2.	08.'s	Marketing and Distribution
3.	10.'s	Communication Technologies
4.	12.'s	Consumer, Personal and Miscellaneous Services
5.	15.'s	Engineering and Engineering-related Technologies
6.	17.'s	Allied Health
7.	18.11	Nursing
8.	20.'s	Vocational Home Economics
9.	41.'s	Science Technologies
10.	43.'s	Protective Services
11.	46.'s	Construction Trades
12.	47.'s	Mechanics and Repairers
13.	48.'s	Precision Production

Prior to the conversion to the new coding system, occupational programs were listed under the following HEGIS taxonomy codes:

1.	5000	Business and Commerce Technologies
2.	5100	Data Processing Technologies
3.	5200	Health Services and Paramedical Technologies
4.	5300	Mechanical and Engineering Technologies
5.	5400	Natural Science Technologies
6.	5500	Public Service Related Technologies
